I feel like there is a slight increase in instructor incentives from control. There is a 7 percentage point increase but 17.75 percent higher relative to control. This can be seen as a big increase for some but to me, it is not. Although teachers have an incentive for students winning 550 per students who pass, students still end up failing. Based off the different departments in the incentive side, they are all somewhat similar as the average passed total for incentive is 0.471.
